the phone processes
and uses the speaker
the voice the signs

ASL to Voice

Google
Amanda

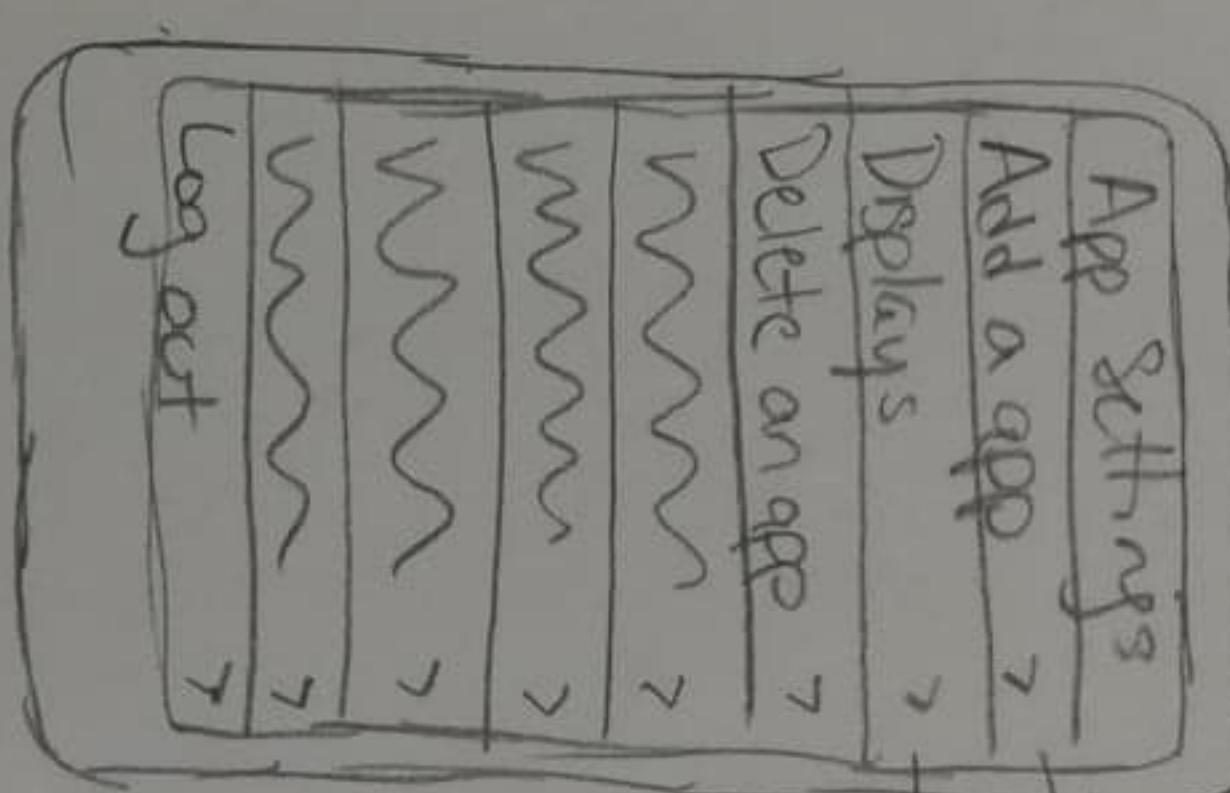

Different voices that can be used (man/woman)

All Medias

An app that shows all of your social media accounts in one place. Facebook, Twitter, Instagram, etc. Write to all, one, or some of your accounts at one time.

Turn on and off account you want to post to

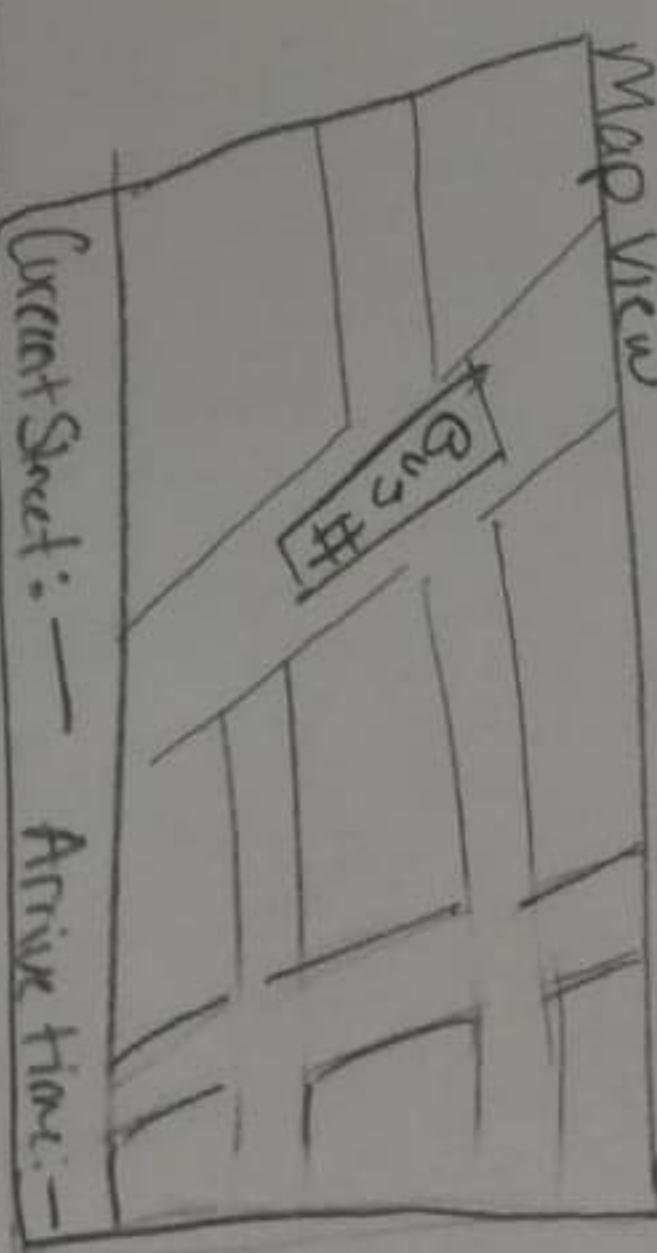

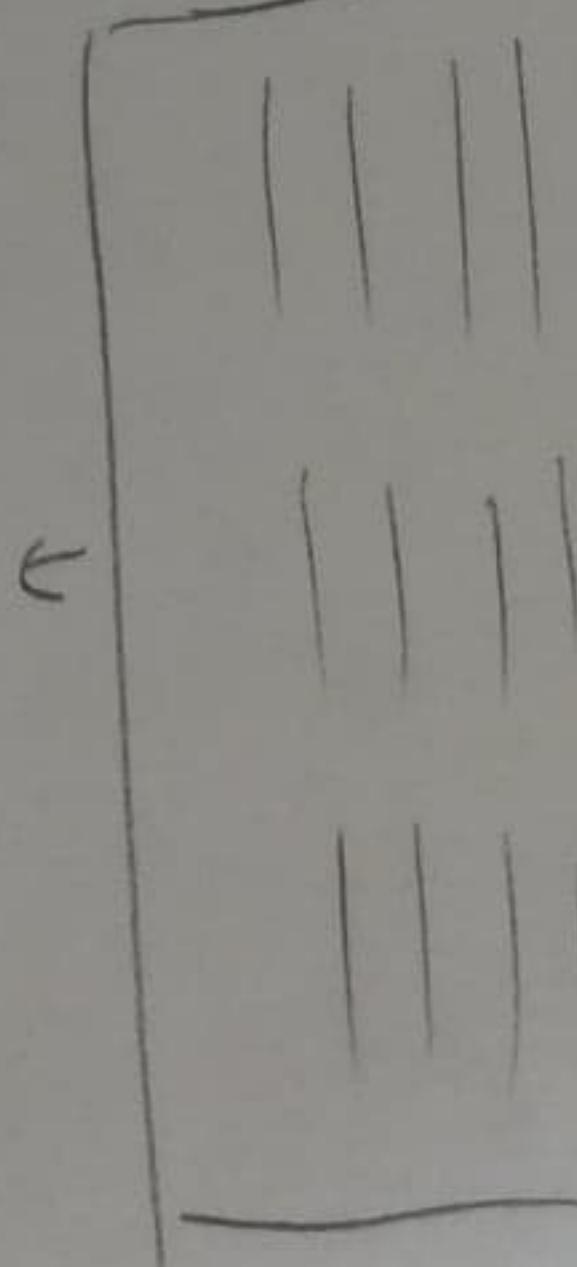

Add your medias
Turn on and off which social medias you see in your feed

APP - Where's My Bus?

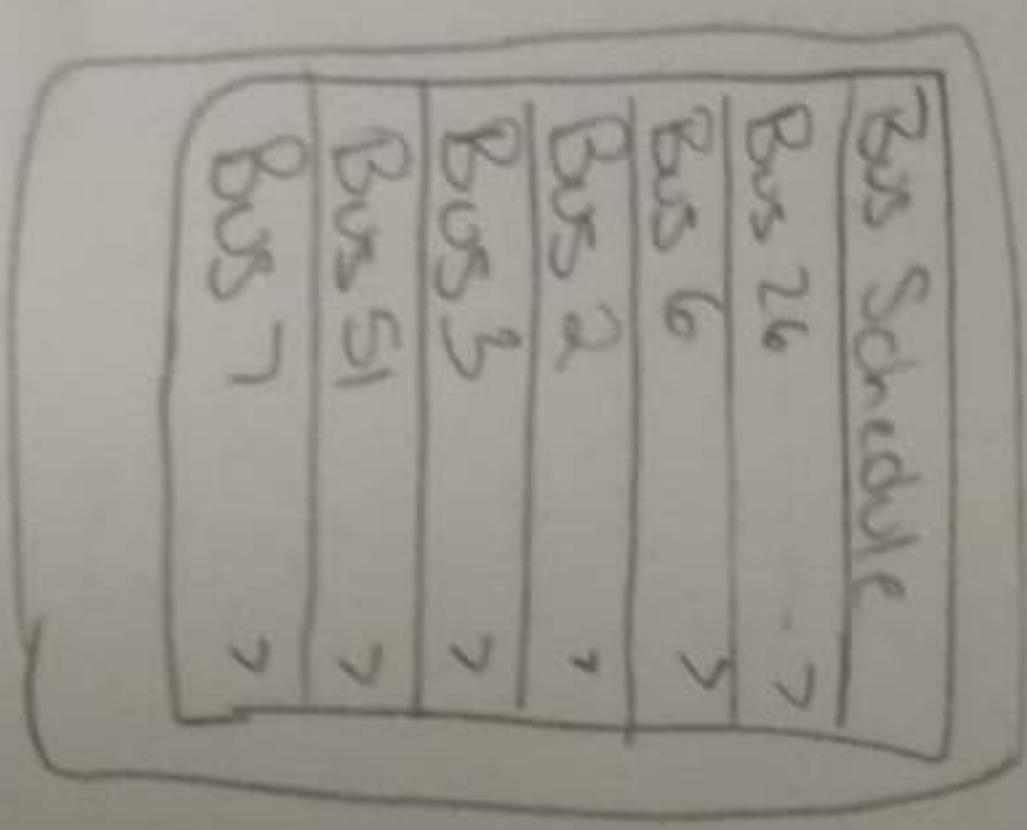

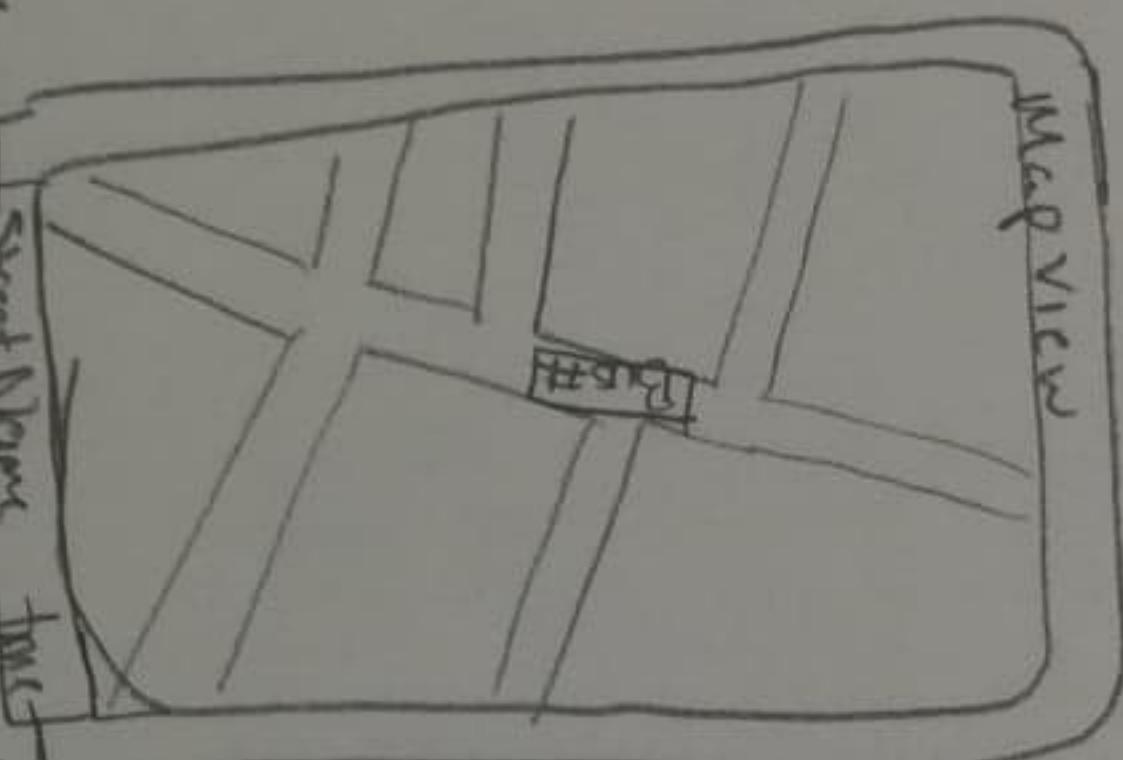

Screen at bus Station

choose a bus:

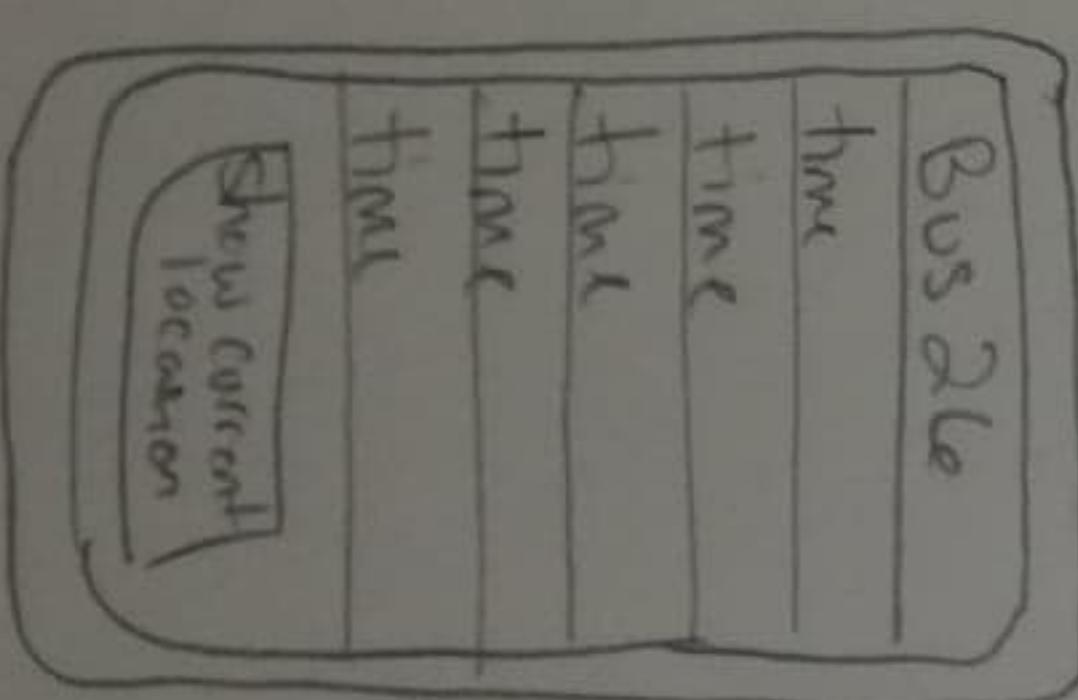

Example:
5min

Currently
on what
street

QR code next to the bus
numbers you are waiting
for

← Not at the bus stop
figure out the times
it comes before leaving
the house

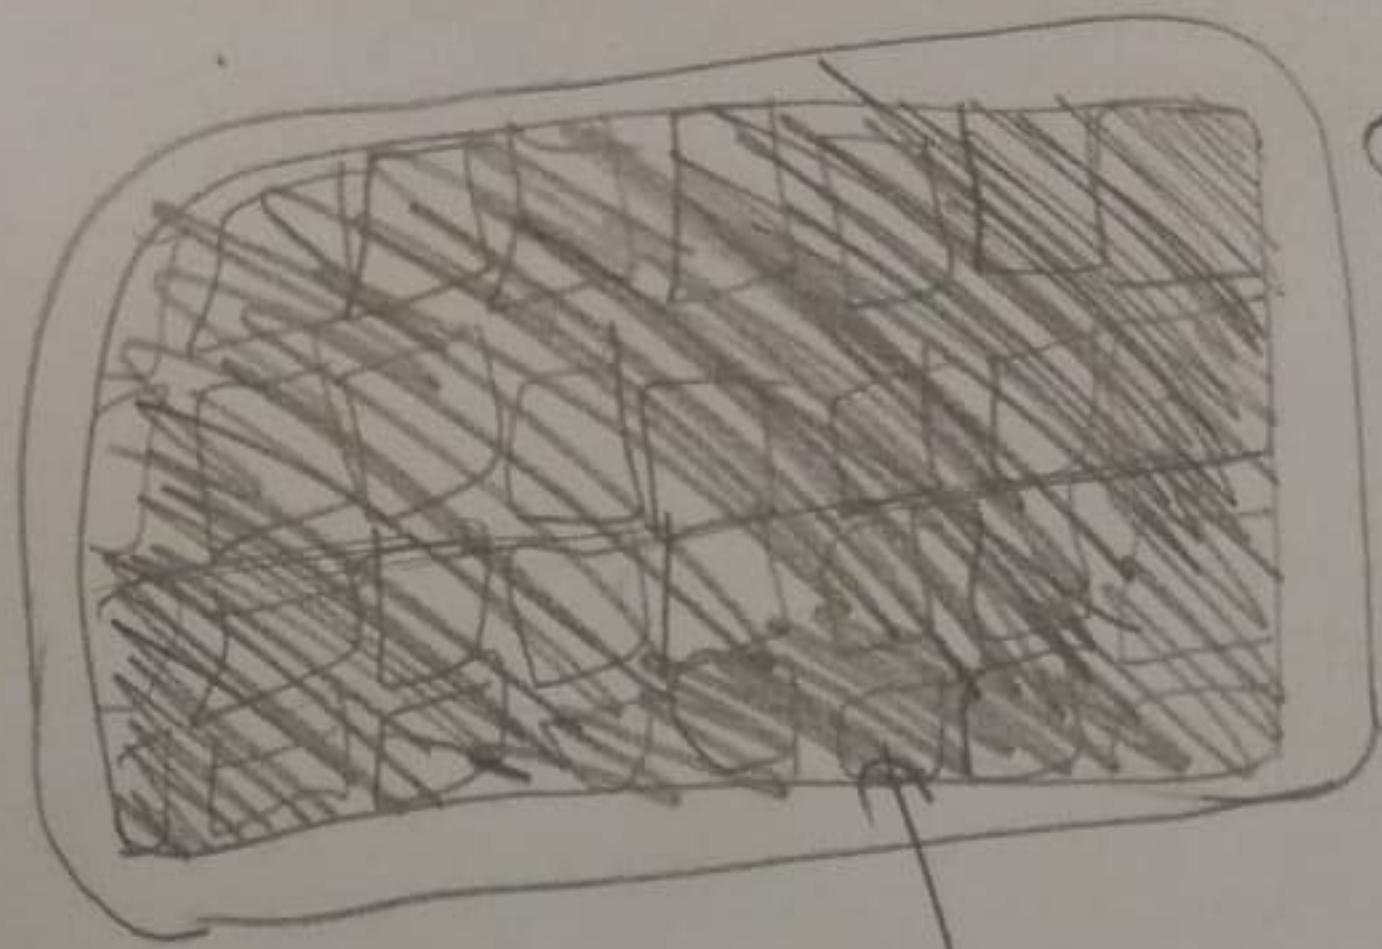

Bus 26
time
time
time
time
time

Show current
location

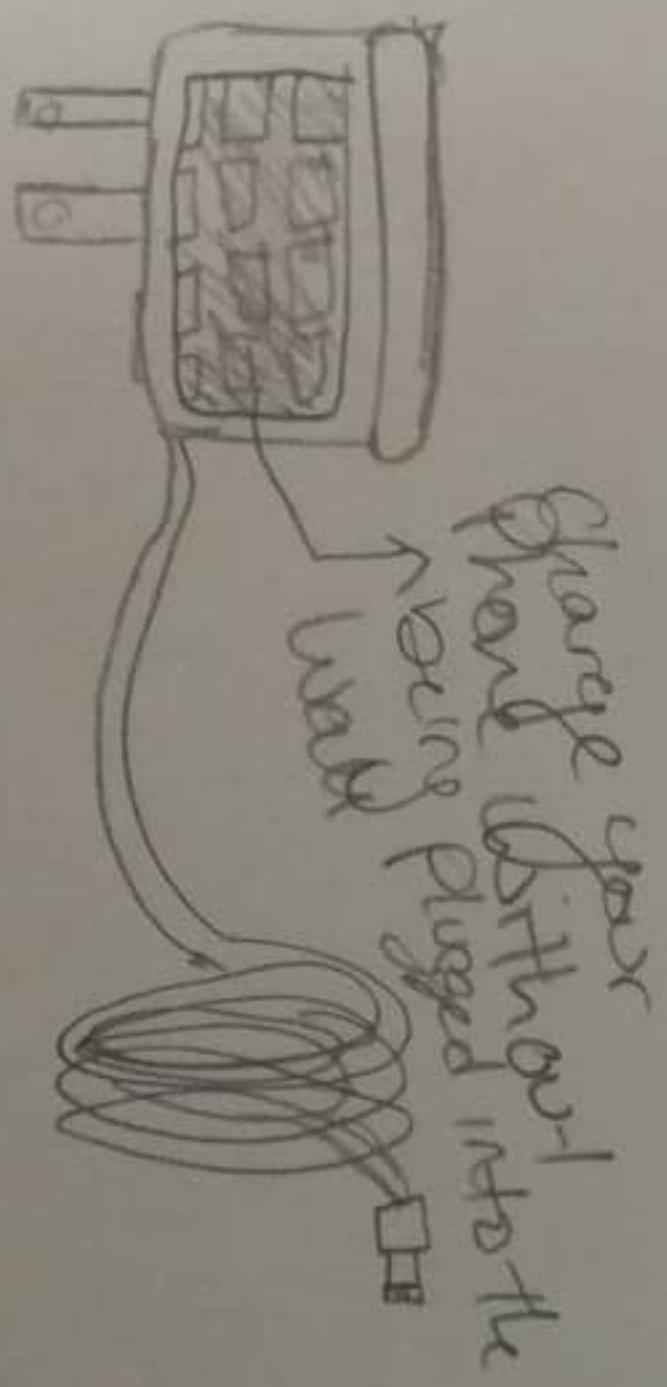

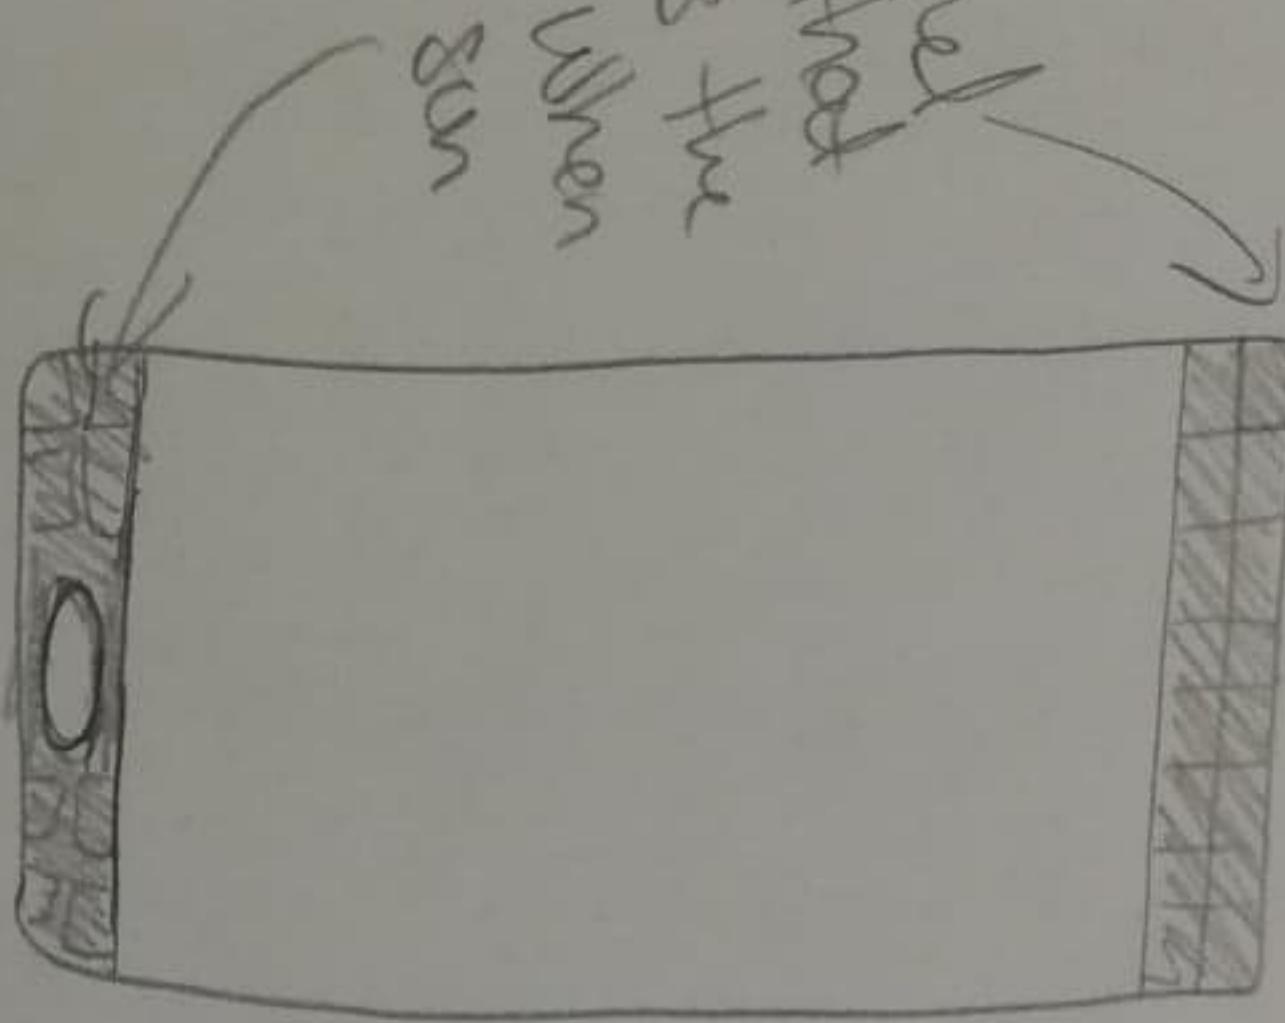

Solar Phone

Back of Phone

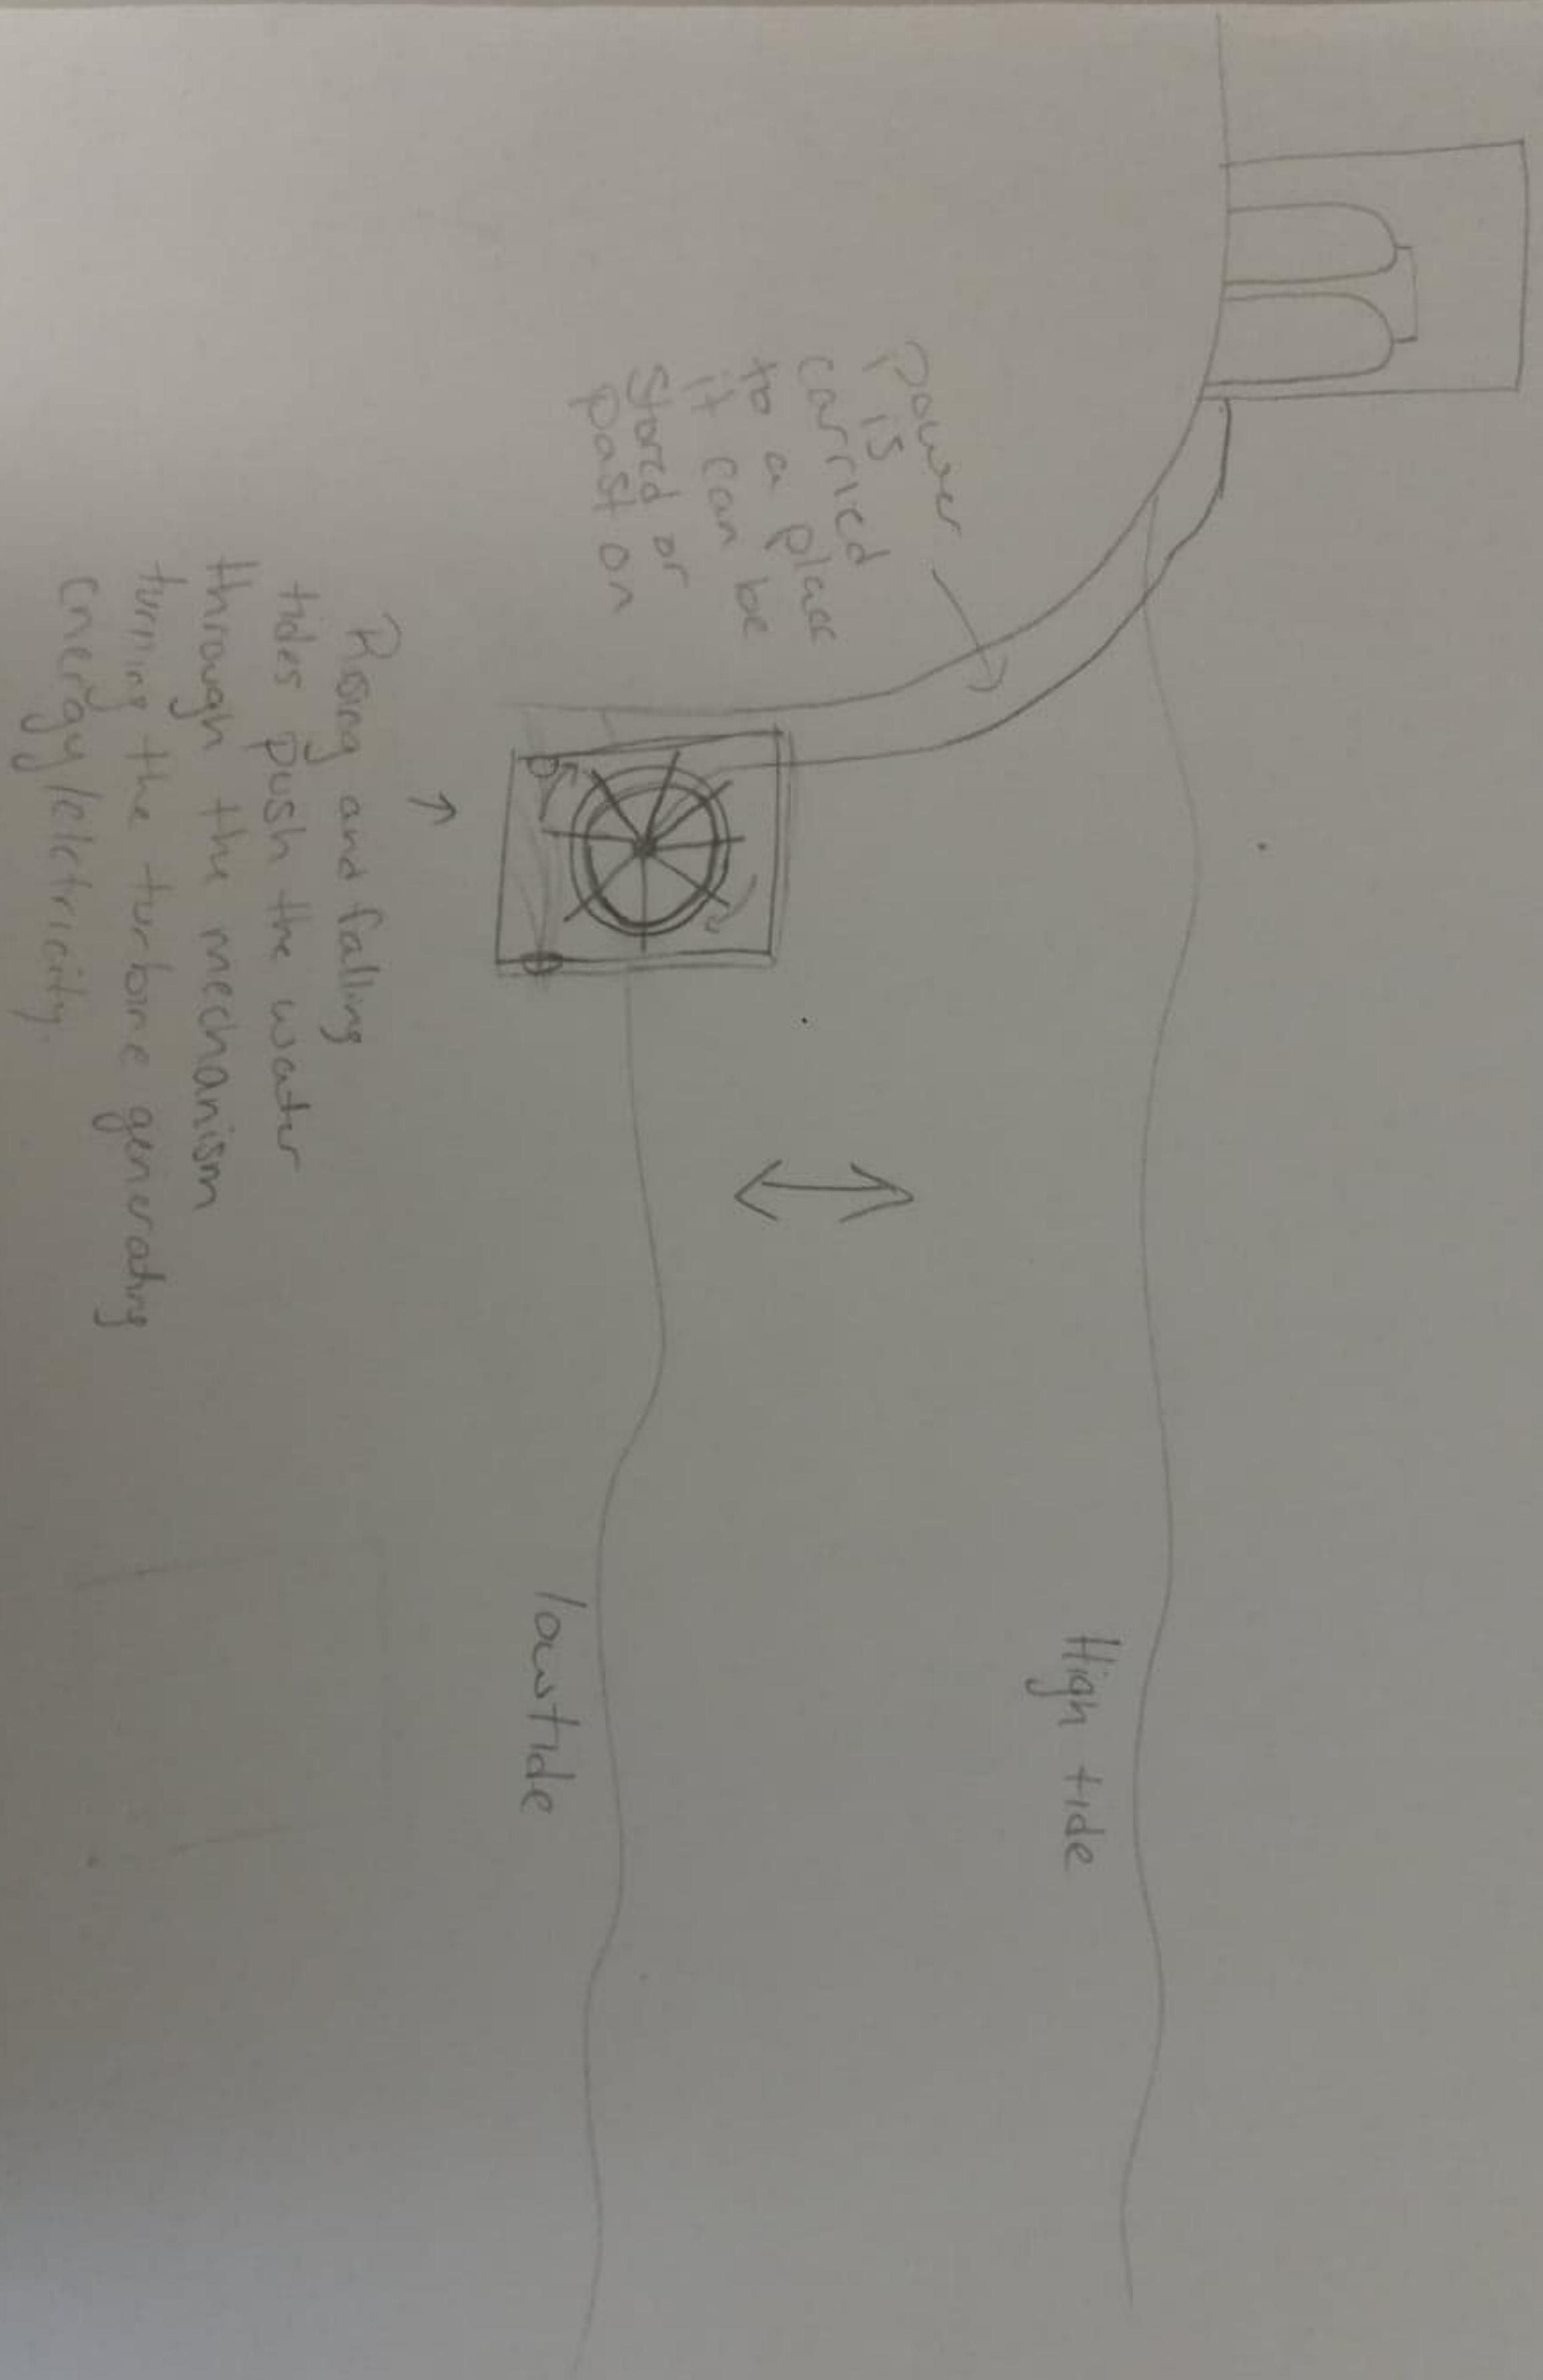

Solar Panel
Catch that
charges the
Phone when
in the sun

front of Phone

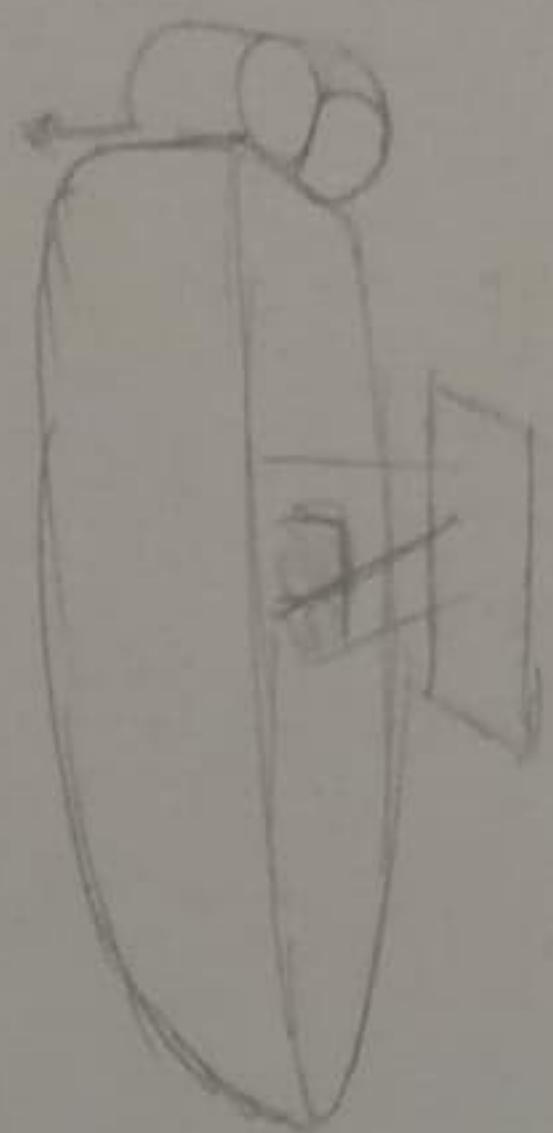

Charge your
phone without
being plugged into the
wall

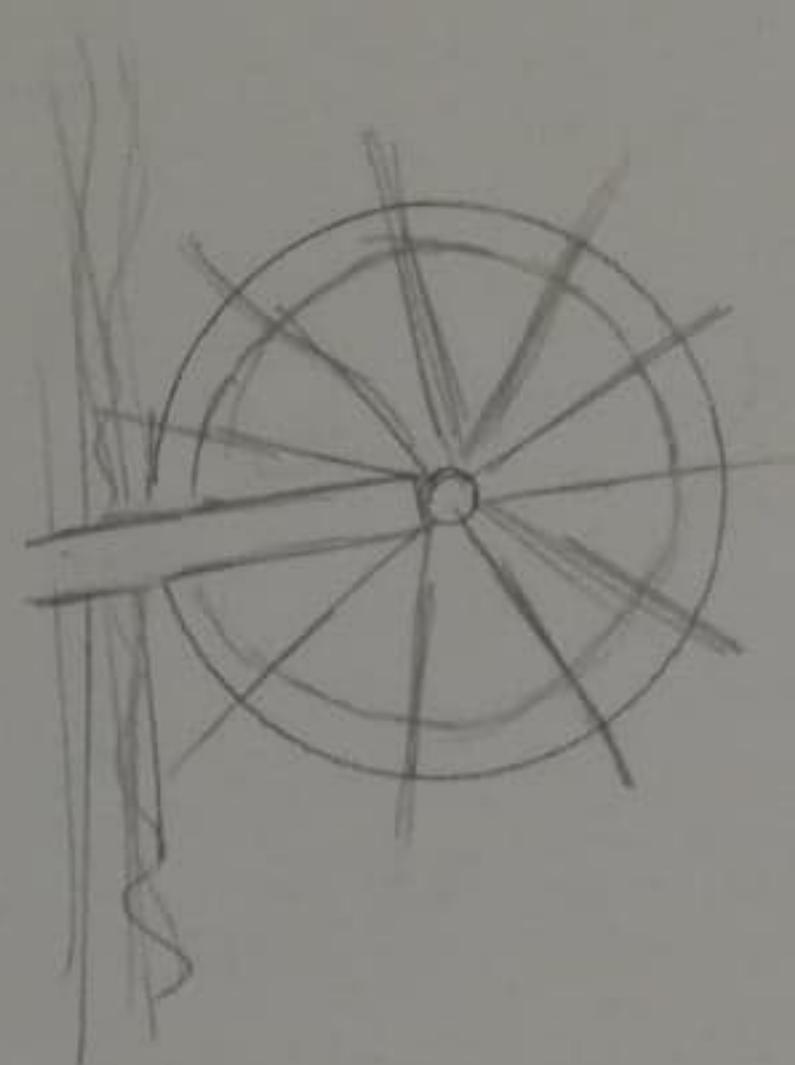

Water Energy

Boat with Water Mills

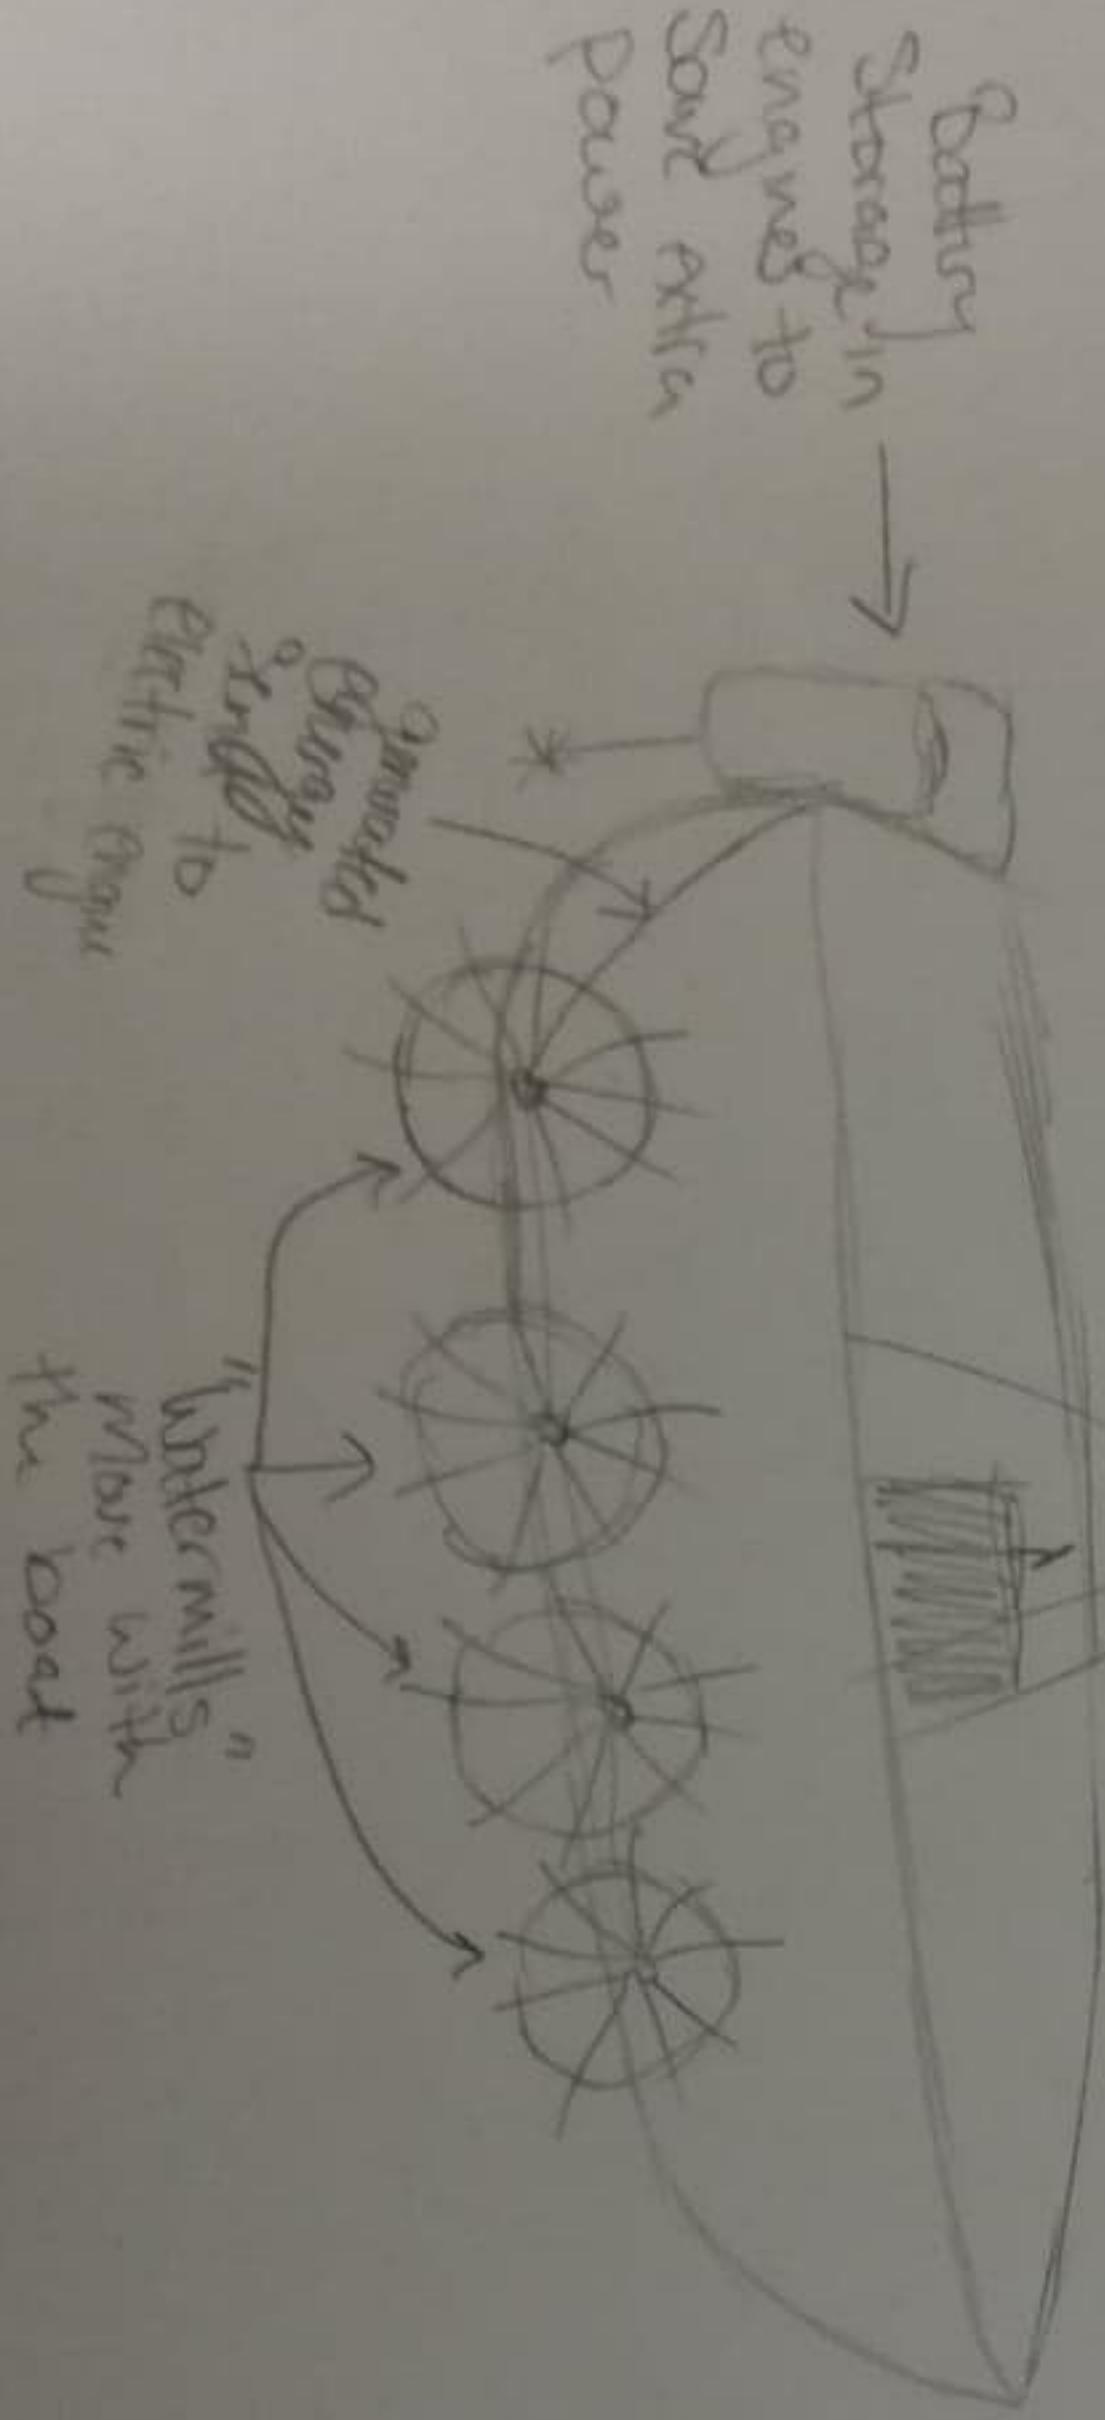

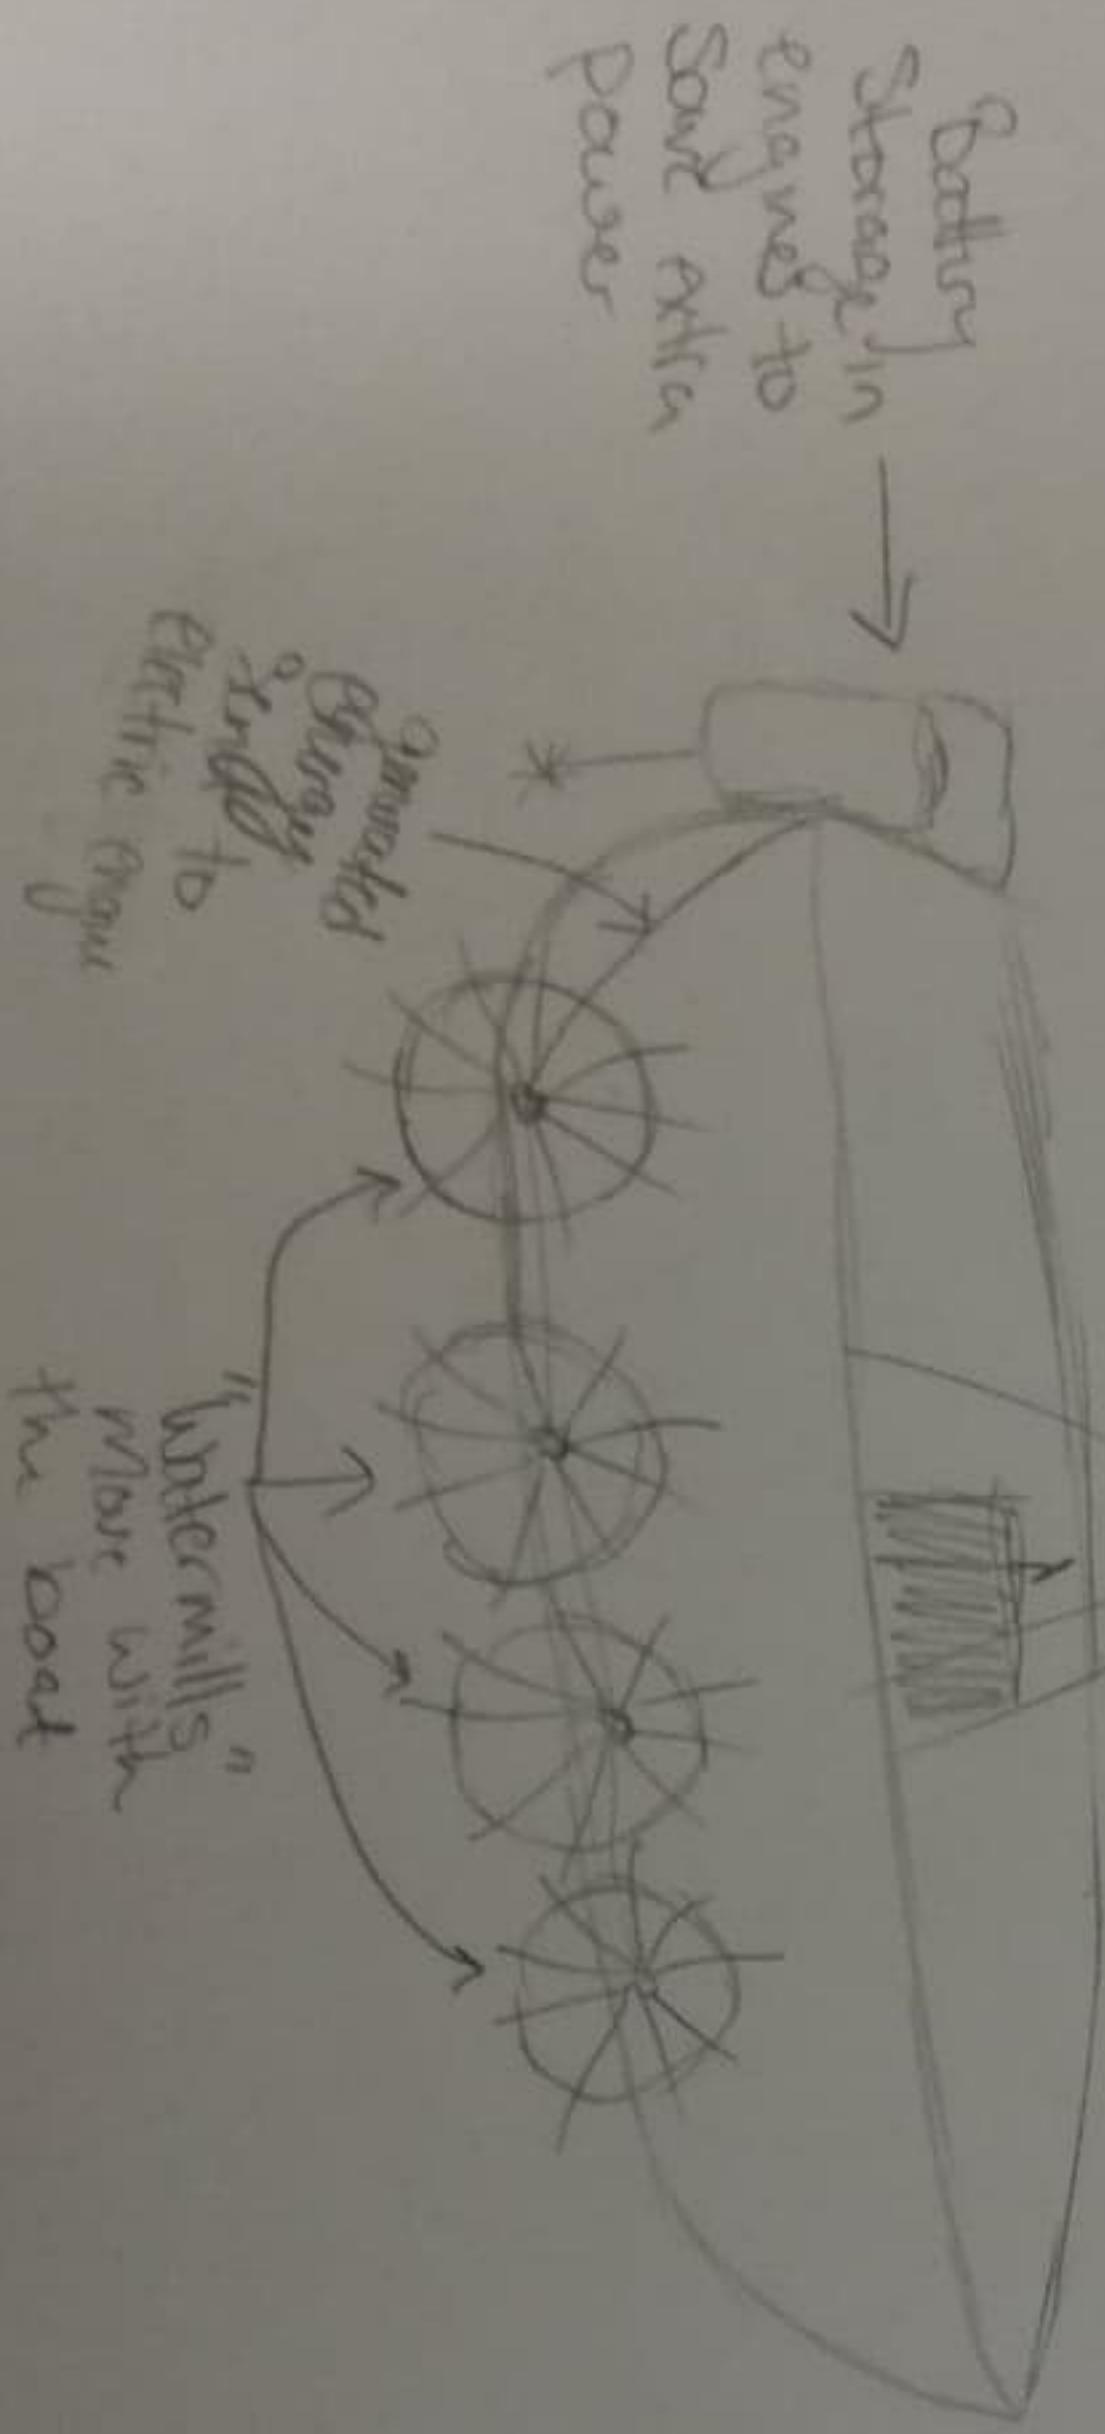

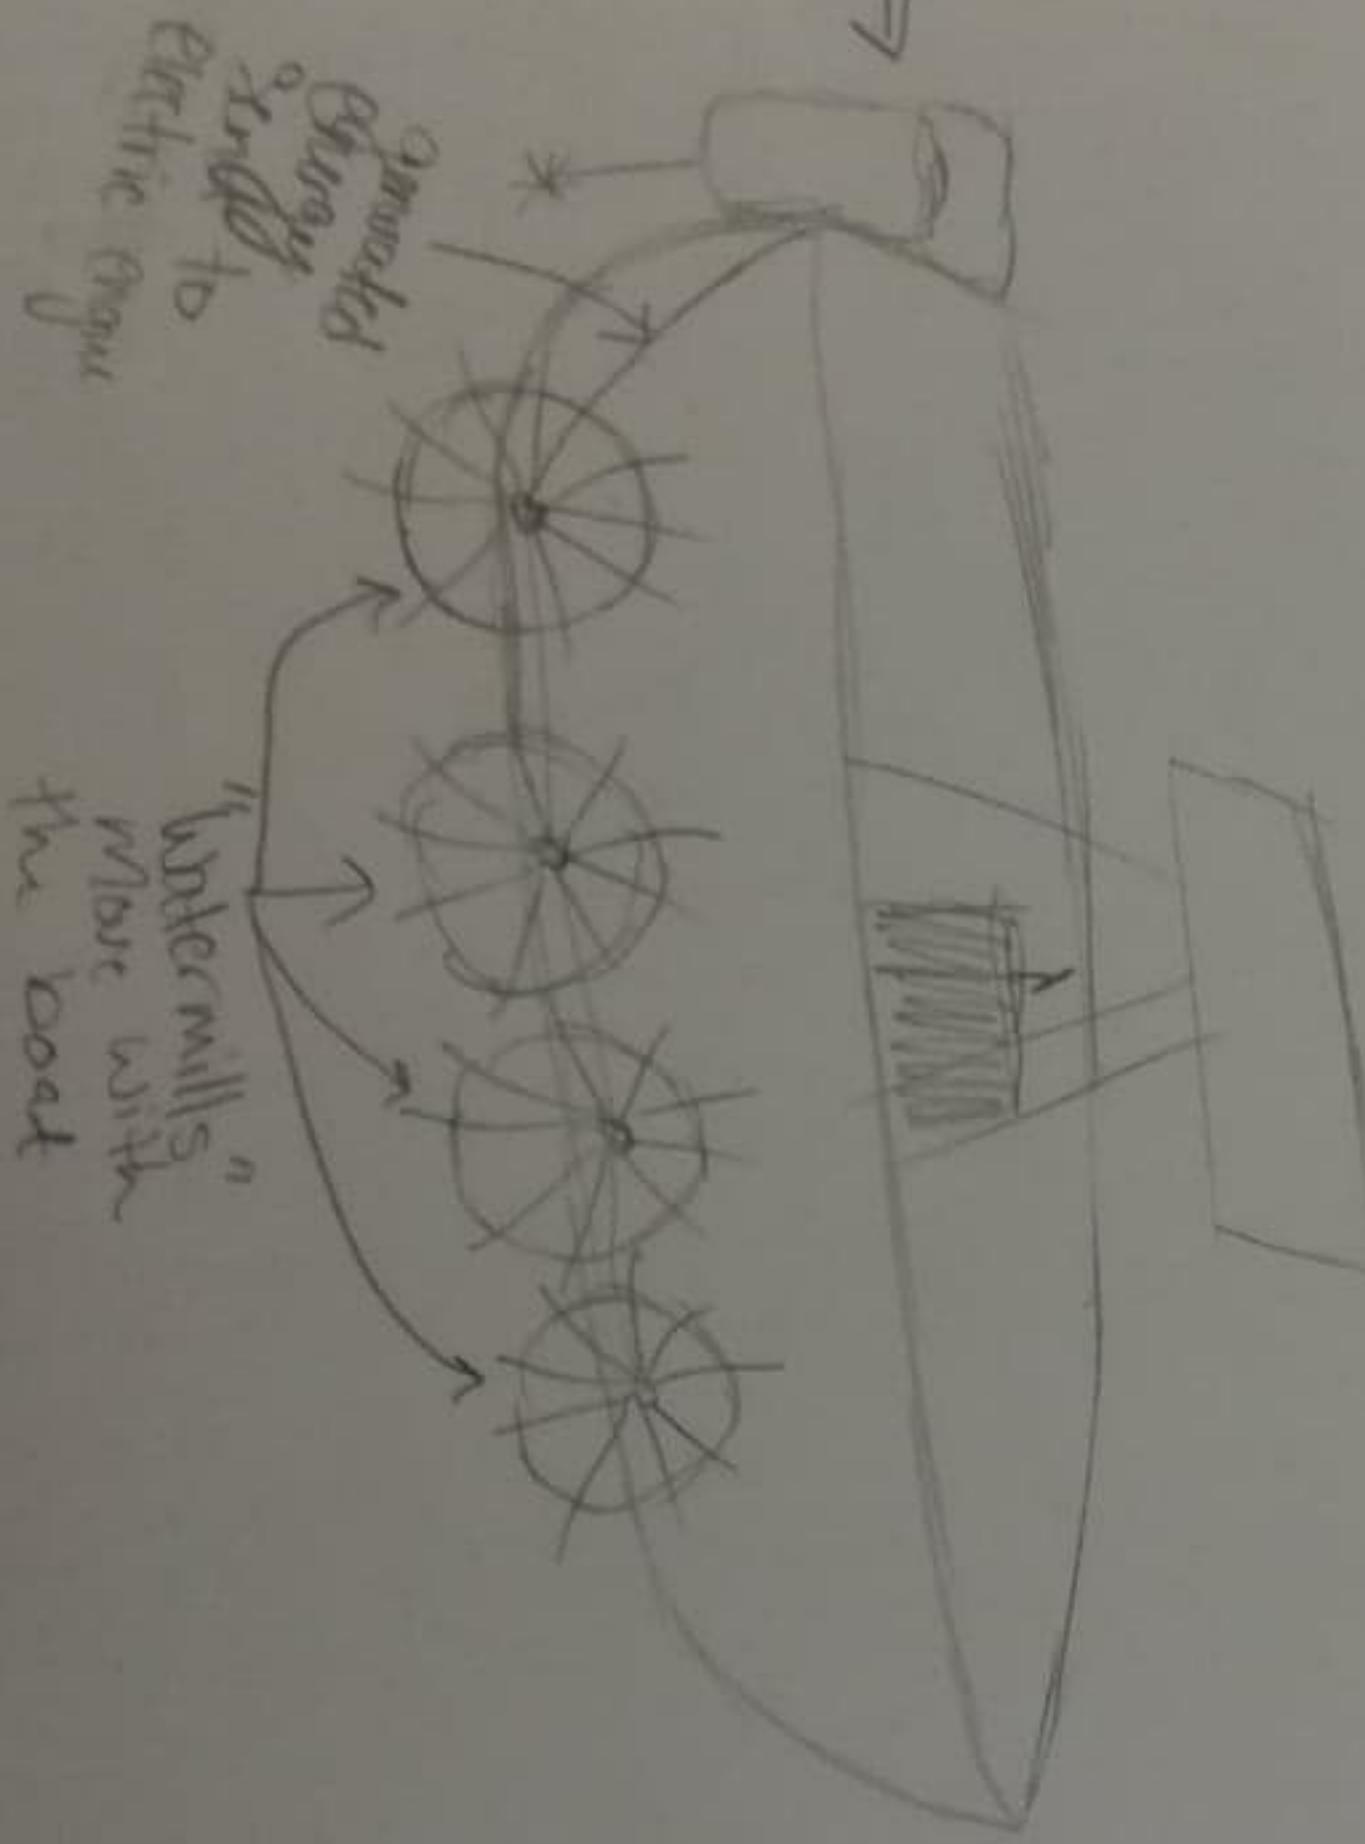

+

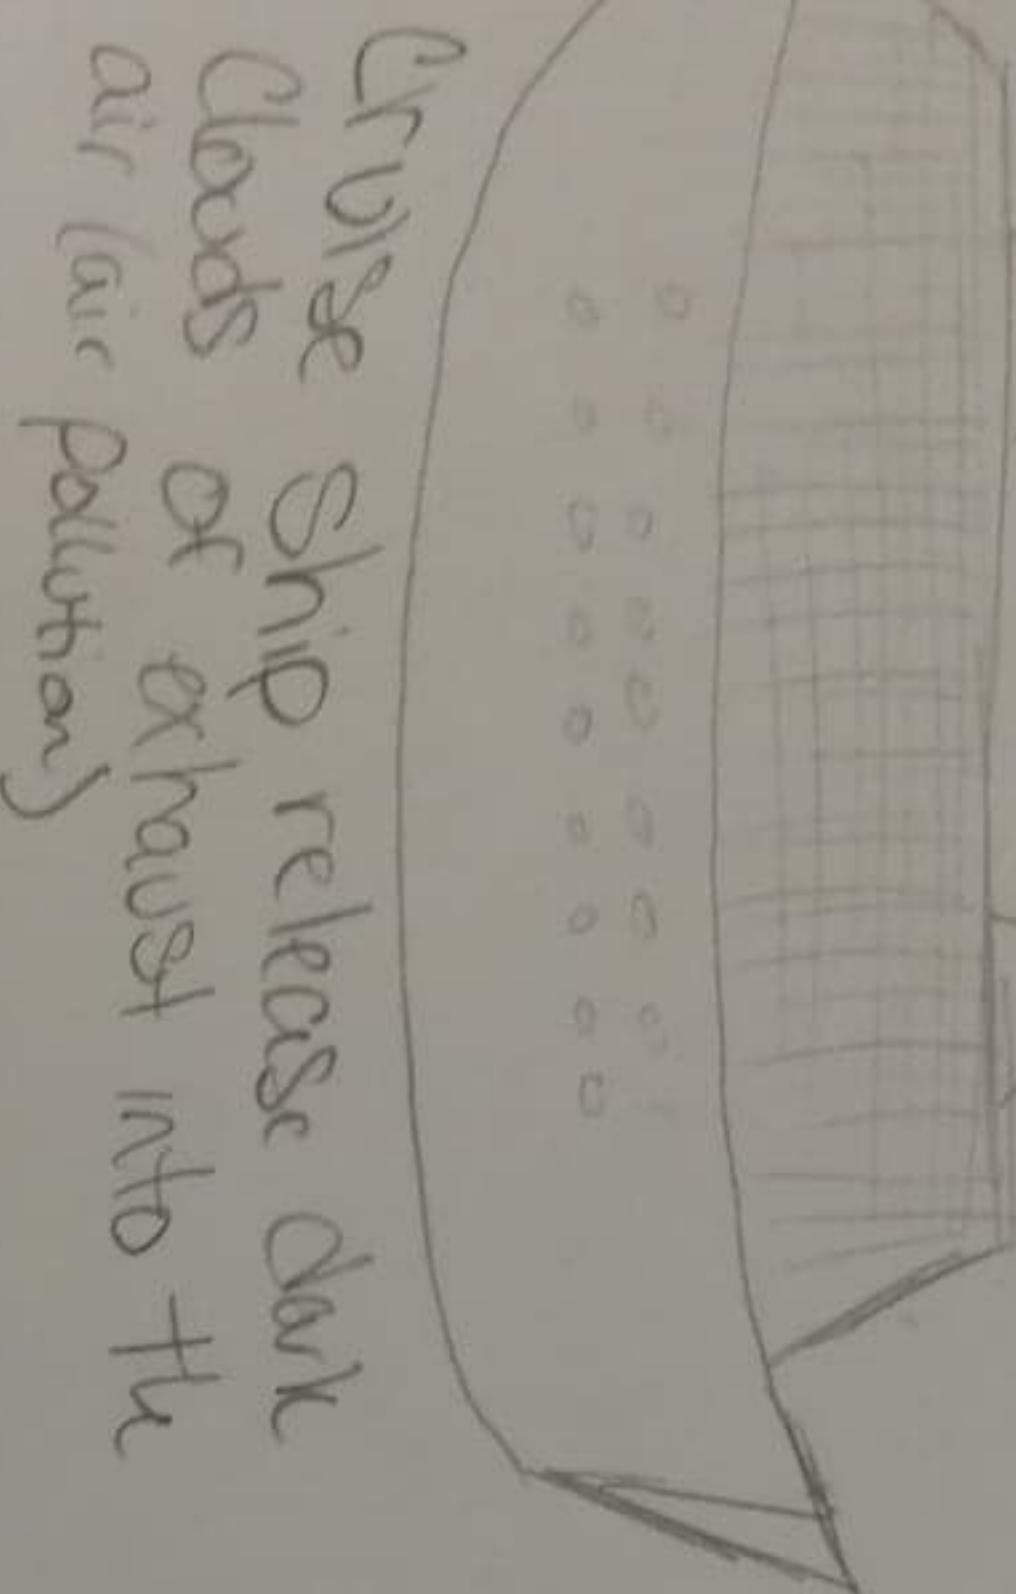

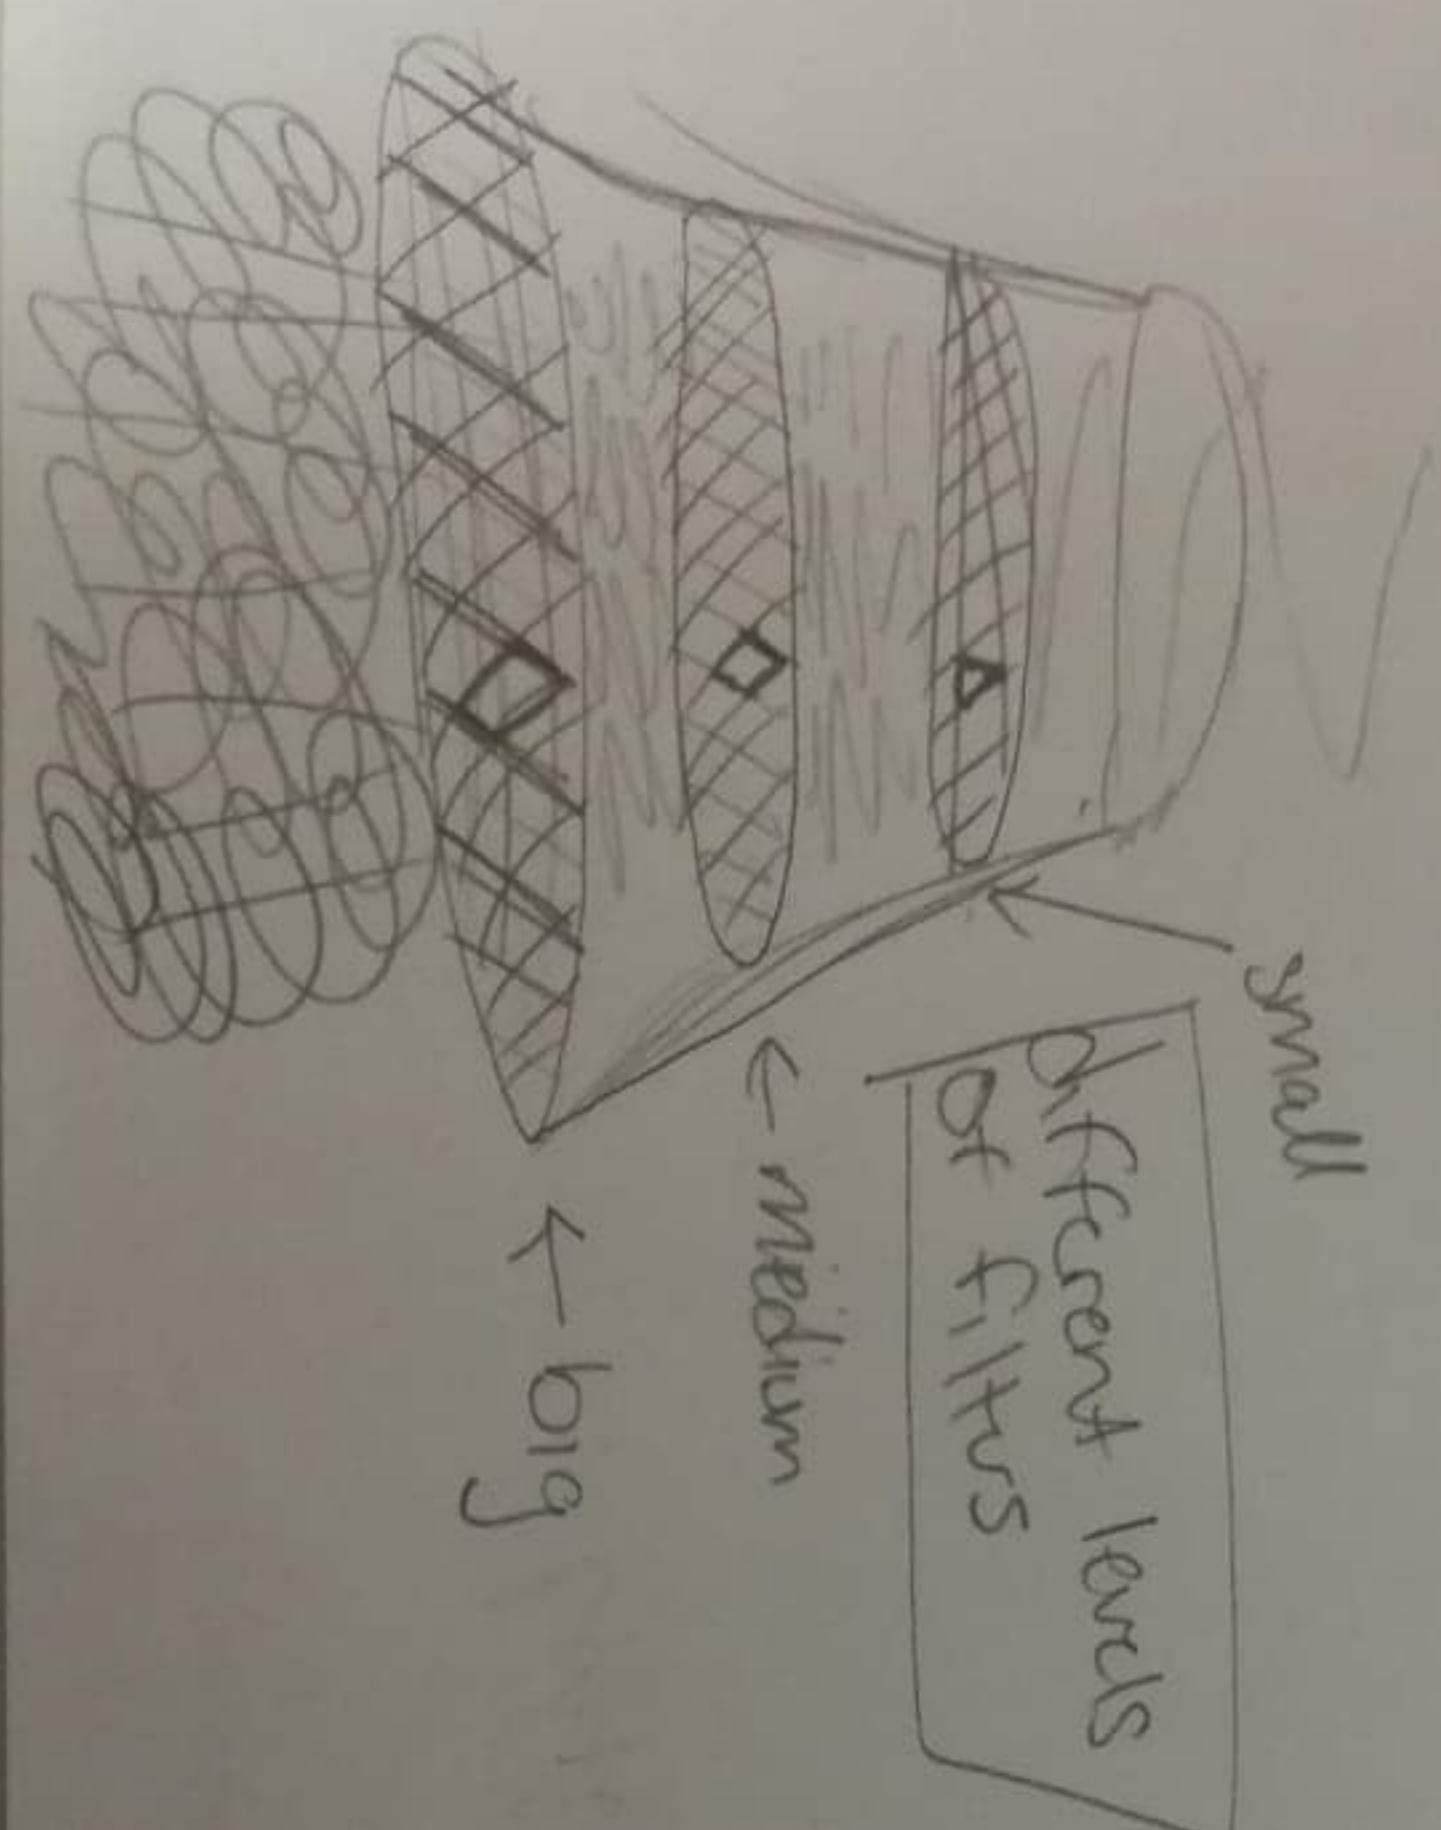

Water mills produce energy in a clean way. The movement of the water generates energy by moving the turbines. Hydroelectricity / water energy

boats are typically powered by engines that run on gasoline or diesel fuel. Both polluting the air and water.

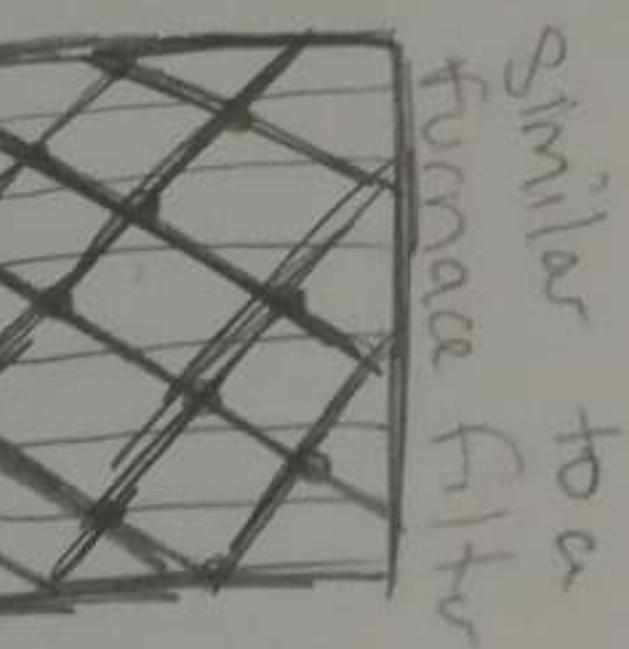

Battery storage →
engines to
Save extra
power

Cruise Ship Filters

Cruise ship release dark clouds of exhaust into the air (air pollution)

Similar to a furnace filter
what if there were big, strong and reusable filters to filter some/all the exhaust.

filter made of strong fibers that can be washed and reused

Also, cruise ships could add more clean energy on board to reduce the dirty exhausts
↳ Solar Panels
↳ hydro power

Caption Glasses

* - bluetooth to connect to sound

of phone or TV

- adjust the location of the captions

- charge port to recharge device
and edit settings (charge color / font size etc)

buttons to adjust
projector

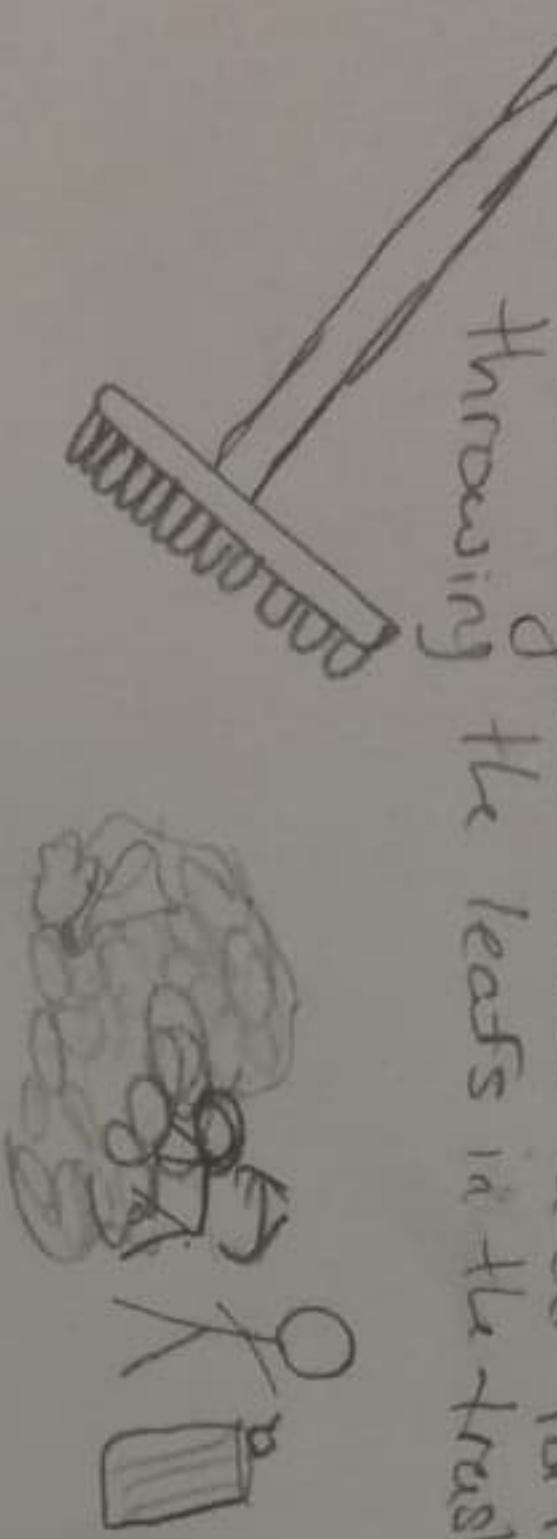

• similar to google glasses
or movie theatre accessible
glasses

• The text would be
visible for the
person wearing
the glasses

Speaker
that takes
in the noise
around the
user.
(similar to
hearing aid
recorder)

Rake it

A regular rake pushes leafs into a pile. And then a person goes back and forth throwing the leafs in the trash.

Jaw like opening
and closing

This rake just adds in a plate and lever. The lever opens and closes the rake head. This allows the user to pick up the leafs with the rake itself.
